

The diagram illustrates a protein structure (red and blue) with a sequence logo overlaid. The logo shows the frequency of nucleotides (A, C, G, U) at each position, with the 5' and 3' ends labeled. The sequence logo is a circular plot where the height of each letter represents its relative frequency at that position. The 5' end is on the left, and the 3' end is on the right. The sequence logo is a circular plot where the height of each letter represents its relative frequency at that position. The 5' end is on the left, and the 3' end is on the right.
